

(外来受診時の付添も含む)

ご面会・付添者の 皆様へお願い

発熱等体調不良時には入館をご遠慮ください

この度、厚生労働省から出された新型コロナウイルス感染症対策の基本方針に基づき、感染経路の遮断という観点から、面会の一定の制限に加え、

〔面会可能：小児、新生児のご両親、妊婦さん、褥婦さん、
婦人科疾患患者さんの配偶者、またはパートナー〕

面会者の体温測定を義務とし、**発熱者は面会不可**とさせていただきます。

また、**検疫強化対象地域**から**帰国後14日経過**していない方の付添来院はご遠慮願います。

ご面会・付添者の皆様は以下についてご協力をお願いします。

- ・来院前に**自宅等**で体温測定実施する
- ・発熱（**37.5℃以上**）時は来院しない
- ・体調が万全でない場合は来院しない
- ・来院の際には必ず**マスク着用**をする

大変ご不便をおかけいたしますが、
ご理解、ご協力のほど何卒宜しくお願いいたします。

2020年3月23日改訂 愛育病院

A Request to Visitors and Those Accompanying Patients

(including those accompanying outpatients)

Do not enter the hospital if you have a fever or feel unwell.

In accordance with the **basic policy for measures for countering the spread of the novel coronavirus** recently issued by the Ministry of Health, Labour and Welfare, in order to block infection channels, we have placed restrictions on hospital visitation.

Permitted visitors: parents of hospitalized newborns/infants; spouses and partners of pregnant women, new mothers, and patients with gynecological disorders

We have also mandated **temperature checks for all visitors**, and **prohibit visits by anyone who is found to have a fever**.

Do not enter the hospital if you have returned from **a designated self-quarantine country within the past 14 days**.

We ask that all visitors and accompanying persons cooperate by observing the following.

- * Measure your body temperature before coming to the hospital (at home, etc.)**
- * Do not come to the hospital if you have a fever (temperature of 37.5°C or above)**
- * Do not come to the hospital if you feel unwell**
- * Always wear a mask when visiting the hospital**

We apologize for the inconvenience, and appreciate your cooperation and understanding.
