

# Notice on husband's attendance in the LDR during labor and delivery

In order to prevent the in-hospital transmission of the new coronavirus infection, **we have established the following conditions for husbands/partners who will be attending the labor and delivery.**

**Within one week of the date of your attendance,**

- ① **Not having unmasked conversations or meals with non-family members who live with you.**
- ② **No symptoms of new coronavirus infection in the attending person.  
(Fever, cough, runny nose, sore throat, fatigue, abnormal sense of taste and smell, etc. )**
- ③ **The person in attendance has not been in contact with a person infected with the new coronavirus.**
- ④ **The person attending does not have a positive test for new coronavirus or is not being tested.**

If the infection spreads more seriously in the future, we may have no choice but to discontinue the attendance of husbands.

**We ask that you and your family take good care of your health and daily activities.**

The situation is always changing, so please check the Aiiiku Hospital website for more information and understanding.
